Re.: Nevada Division of Environmental Protection Response to:
Data Validation Summary Reports – Dataset #7c, 8c, and 9 (various dates)
NDEP Facility ID# H-000688

Dear Mr. Paris:

The NDEP has received and reviewed BRC's correspondence identified above and finds that the reports for datasets #7c and 8c are acceptable.

The NDEP has the following comments regarding dataset #9:

1. Section 1.0, it is noted that hexavalent chromium and anion analyses are also included in this report and shown in Table 1-1. These two analytes are not included in Section 1.0.
2. Database, it was noted in the database that many of the iron results show that the method used was 3060A/7196. This method is not applicable for iron. It was also noted that hexavalent chromium is associated with both methods 3060A/7196 and 6010, only the first method combination is correct (3060A/7196). The database should be corrected and reviewed against the laboratory results to ensure no other discrepancies are included.

Please revise and resubmit the report for dataset #9. Should you have any questions or concerns, please do not hesitate to contact me at (702) 486-2850x247.

Sincerely,

Brian A. Rakvica, P.E.
Supervisor, Special Projects Branch
Bureau of Corrective Actions
